

PROTIMETER®
Grainmaster i

Integrated moisture and temperature measurement

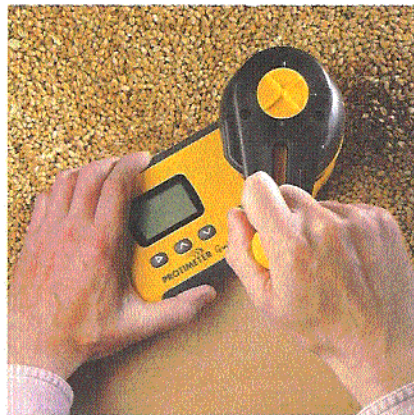

Protimeter are associated with rugged and reliable grain moisture meters that test ground samples for proven measurement accuracy and consistency. The Protimeter *Grainmaster i* builds on these strengths by offering further refinement and versatility at a competitive price.

Simple

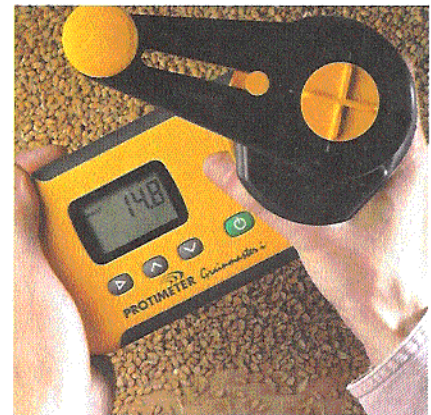

Load the Grinder Compressor

Fast

Prepare the sample

Reliable

Measure

The *Grainmaster i* is supplied in a pouch with grinder-compressor unit, grain cup, sample spoon, brush and 'Quickcheck'. In addition to the 0 - 100 relative scale, 15 crop calibrations are pre-programmed into the instrument as listed below:

- | | | |
|----------------|-------------|-----------|
| ● Wheat | ● Linseed | ● Soya |
| ● Barley | ● Peas | ● Rice |
| ● Oats | ● Corn | ● Sorghum |
| ● Oilseed Rape | ● Sunflower | ● Paddy |
| ● Canola | ● Coffee | ● Beans |

A range of optional probes can be used with the *Grainmaster i*, offering the user integrated moisture and temperature measurement capability. Temperature Probes and Bale Probes are available now. A Moisture and Temperature Probe - for grain storage management applications - will be available in 2001.

The information in this leaflet is given in good faith. But since the method of use of the meters and the interpretation of the readings are beyond the control of the manufacturers, they cannot accept responsibility for any loss, consequential or otherwise, resulting from or involving the use of the meter, the specification of which may be changed without prior notice. Protimeter and Grainmaster are Registered Trade Marks. © Protimeter plc, Feb 2000.
