## General Specifications

## UT75A

Digital Indicating Controller

## UTFAdvanced.

## GS 05P01B41-01EN

## ■ Overview

The UT75A digital indicating controllers employ an easy-to-read, 14-segment large color LCD display, along with navigation keys, thus greatly increasing the monitoring and operating capabilities. A ladder sequence function is included as standard. The short depth of the controller helps save instrument panel space. The UT75A also support open networks such as Ethernet communication.

## Features

- A 14-segment, active (PV display color changing function) color LCD display is employed.
Two five-digit, high-resolution displays are possible. Alphabet letters can be displayed in an easy-to-read manner. The guide display shows parameter names.
- Easy to operate Navigation keys (SET/ENTER and Up/Down/Left/Right arrow keys) are employed to facilitate making settings.
- 65 mm depth

The small depth enables the mounting in a thin and small instrumented panel.

- Ladder sequence function is included as standard. This function allows for creating a simple sequence control. Dedicated LL50A Parameter Setting Software (sold separatly) allows for performing programming using a ladder language.
Multi-line ladder programs such as numerical computation can be simplified using custom ladder instructions. Custom ladder programs allow for secure management using passwords.
- Various built-in open network functions such as Ethernet are available.
Easy connection with various vendors' PLCs is possible.
- Quick setting function

Setting only the minimum necessary parameters for operation is possible. (For single-loop control only)

- Equipped with a multitude of functions Universal I/O, eight control modes (dual-loop control, cascade control, etc) and program pattern operation are included as standard. PID control, heating/cooling control, feed forward control, etc. are available.
- LL50A Parameter Setting Software (sold separately) The parameters and ladder programs of UTAdvanced digital indicating controller can be built from a PC using this software. It makes data management even easier.
- Dust-proof and drip-proof

IP66 (for front panel) (Not applicable to side-by-side close mounting.)
NEMA4 (Hose-down test only)
