Introduction
The hand-held, battery-operated Fluke 772 and 773 Milliamp Process Clamp Meters (the Meter) can be used in troubleshooting transmitters, valves, PLC and DCS I/O. Unlike conventional clamp meters, the Meter features a remote jaw that is connected to the main body via extension cable.

Features
- In-circuit measurement of 0-24 mA dc and up to 99.9 mA dc using a remotely connected clamp via extension cable
- 0-24 mA dc sourcing and simulating
- 0-10 V dc sourcing (773)
- Loop power supply 24 V dc output
- 0-30 V dc measurement (773)
- Scaled mA output (773)
- Simultaneous mA measurement via detachable clamp and mA sourcing (773)
- 250 Ω HART resistor for mA source
- Electronic zero
- Percentage span (0-100 %)
- Hold
- Auto power off (battery saver)
- Display backlight
- Measurement spotlight LED
The Meter comes with:
- Four AA alkaline batteries (installed)
- Soft carrying case
- TL75 test leads
- AC 72 detachable clip
- TL 940 mini hook test leads
- Instruction sheet

**Contacting Fluke**
To contact Fluke, call one of the following telephone numbers:
- Technical Support USA: 1-800-44-FLUKE (1-800-443-5853)
- Calibration/Repair USA: 1-888-99-FLUKE (1-888-993-5853)
- Canada: 1-800-36-FLUKE (1-800-363-5853)
- Europe: +31 402-675-200
- Japan: +81-3-3434-0181
- Singapore: +65-738-5655
- Anywhere in the world: +1-425-446-5500

Or, visit Fluke's website at [www.fluke.com](http://www.fluke.com).
To register your product, visit [http://register.fluke.com](http://register.fluke.com).
To view, print, or download the latest manual supplement, visit [http://us.fluke.com/usen/support/manuals](http://us.fluke.com/usen/support/manuals).

**Safety Information and Symbols**
A **Warning** statement identifies hazardous conditions and actions that could cause bodily harm or death.
A **Caution** statement identifies conditions and actions that could damage the Meter or the equipment under test.

⚠️⚠️ **Read First: Safety Information**

To ensure safe operation and service of the Meter, follow these instructions:
- Read the Instruction Sheet before use and follow all safety instructions.
- Use the Meter only as specified in the Instruction Sheet; otherwise, the Meter’s safety features may be impaired.
- Before each use, inspect the Meter and cable for damage. Look for cracks and missing portions of the clamp and cable. Do not use if clamp is damaged.
- Use caution when working with voltages above 33 V rms 47 V peak or 70 V dc; these voltages pose a shock hazard.
- Do not use to measure ac current.
- Do not use to measure ac voltage.
- Avoid working alone so assistance can be rendered in an emergency.
• Use extreme caution when working around bare conductors or bus bars. Contact with the conductor could result in electric shock.

• To avoid false readings that can lead to electrical shock and injury, replace the batteries as soon as the low battery indicator \( \text{B} \) appears.

• Adhere to local and national safety codes. Individual protective equipment must be used to prevent shock and arc blast injury where hazardous live conductors are exposed.

• When measuring, keep fingers behind the Tactile Barrier. See Figure 1.

• Do not use on non-insulated conductors.

• Do not use near strong magnetic fields.

• Remove test leads before opening case.

Table 1 explains the symbols that are used on the Meter or in this Instruction Sheet.

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Explanation</th>

**Figure 3. Display** (773 shown)
The following sections give more detail about the Meter’s features.

**Percentage Span**

The Source and Simulate Percentage Span feature displays the span for 4 to 20 mA loops. Use [100%], [75%], [50%], and [25%] to adjust the source or simulated current (772) or dc voltage and current (773).

<table>
<thead>
<tr>
<th>20 mA</th>
<th>100 %</th>

<td>0 mA</td>
<td>-25 %</td>
</tr>
</tbody>
</table>

**Zero Adjust**

Before taking measurements with the clamp, push [ZERO] to zero the display by removing the offset. Make sure the clamp jaws are closed and no current is flowing through them before zeroing.

**Backlight**

Press [B] to turn the backlight on and off. The backlight automatically turns off after 2 minutes.
**User Options**

Several user options can be activated at Meter power up. Hold \[N\] when powering on the Meter. While holding down \[N\], toggle on/off each option by repeatedly pressing the following keys:

- \[Q\] toggle on/off backlight auto off. Display shows \[bLit on or oFF\].
- \[A\] toggle on/off spotlight auto off. Display shows \[SLit on or oFF\].
- \[H\] toggle on/off auto power off. Display shows \[PoFF on or oFF\].

When all key are released, the software version appears and the Meter enters Clamp Measure mode.

**Measurement Spotlight LED**

The Measurement Spotlight LED helps to quickly find mA signal wires. Press \[A\] to activate it. To extend battery life, the light automatically turns off after 2 minutes.

**Display HOLD**

⚠️ Warning

To avoid electric shock, be aware of the measurement being taken when using Display HOLD. When Display HOLD is activated, the display will not change when different currents are applied.

Press \[HOLD\] to activate Display Hold mode. The display shows \[HOLD\] and the display freezes. To exit and return to normal operation, press \[HOLD\] a second time. When in Auto Ramping mode, \[HOLD\] stops ramping.

**Auto Ramping the Output**

Auto ramping can continuously apply a varying output from the mA source to a device while your hands remain free to test the response. When \[\text{\text{\text{\text{\text{\text{)}}}}}\] is pressed, the Meter produces a repeating 0 % - 100 % - 0 % ramp in a choice of three ramp waveforms:

- \[\text{\text{\text{\text{\text{\text{)}}}}}\] 0 % - 100 % - 0 % 40-second smooth ramp
- \[\text{\text{\text{\text{\text{\text{)}}}}}\] 0 % - 100 % - 0 % 30-second smooth ramp
- \[\text{\text{\text{\text{\text{\text{)}}}}}\] 0 % - 100 % - 0 % 25 % step ramp, 10 seconds each step.

To exit ramping, press any button.

**Probe Holder**

The Meter is equipped with a probe holder that can either hold a test probe or can be used to attach the Fluke ToolPak. See Figure 5.

![Figure 5. The Probe Holder](Fjv08.eps)
**Taking Measurements**

⚠️ **Warning**

To avoid electric shock, do not use the clamp on non-insulated conductors.

Measurements can be taken with the clamp in the docked position, remotely using the 1 m cable, or via test leads. For accurate measurements:

- Always zero the Meter prior to taking measurements with the clamp.
- To reduce magnetic influences, zero the Meter as close to the measurement in the same position or jaw direction that is used for the measurements as possible.
- Make sure the clamp is free of contamination.

To use the clamp for measurements:

1. Press \[\text{ }\] to enter Clamp Measure mode and to zero the Meter. Clamp mode includes clamp measure, mA scale output, and mA IN/OUT. If necessary, press \[\text{ }\] to change to mA scale.
2. Clamp the jaw around the conductor under test. The Meter displays the measured conductor current. See Figure 6.
   - A positive reading indicates current flowing in the direction of the arrow on the clamp.
   - A negative reading indicates current flowing in the opposite direction of the arrow.
   - Do not clamp more than one wire.

The small secondary display shows the reading in mA percentage of span.

![Figure 6. Taking Measurements with the Clamp](fpv03.png)
To use the test leads for measurements:
1. Insert the test leads into the proper input jacks. See Figure 7.
2. Press the correct button for the measurement.
3. Apply the test leads.
4. Observe the reading on the main display. In mA mode, the secondary display shows the reading in percentage of span.

Figure 7. Taking Measurements with the Test Leads

**Current and Voltage Output Functions**

Both Meters provide steady, stepped, and ramped current output for testing 0-24 mA current loops. Additionally, the 773 provides voltage output to 10 V. To access these functions, press as necessary.
- Choose Source mode to supply current or voltage.
- Choose Simulate mode to regulate current in an externally powered current loop.
- Choose Loop Supply mode to power an external device and measure mA loop current.

**Sourcing mA**

Use mA Source mode whenever it is necessary to source current into a passive circuit such as a current loop with no loop supply. Source mode depletes the battery faster than Simulate mode.

To enter Source mode for the 772, see Figure 4:
1. Insert the test leads into the -mA and +mA jacks.
2. Press \( \text{mA} \).
3. Press until Source appears on the display.
To enter mA Source mode for the 773, see Figure 8:
1. Insert the test leads into the desired input jacks.
2. Press \( \text{mA} \).
3. Press \( \text{Source} \) until Source appears on the display.

**Figure 8. Sourcing mA Output**

**Simulating mA Output**

In Simulate mode, the Meter simulates a current loop transmitter. To enter Simulate mode, see Figure 9:
1. Insert the test leads into the mA+ and mA- input jacks.
2. Press \( \text{mA} \).
3. Press \( \text{Simulate} \) until Simulate appears on the display.
Loop Supply

In Loop Supply mode, the Meter powers a transmitter while measuring the mA signal. To enter Loop Supply mode, see Figure 10:

1. Insert the test leads into the LOOP PWR jacks. See Figure 10.
2. Press \( \text{ } \).
3. Press \( \text{mA} \).

The Meter is now in Loop Supply mode.
Maintenance

⚠️⚠️ Warning
To avoid possible electric shock or personal injury, repairs or servicing not covered in this manual should be performed only by qualified personnel.

Cleaning the Meter

⚠️⚠️ Warning
To avoid electrical shock, remove any input signals before cleaning.

⚠️ Caution
To avoid damaging the Meter, do not use aromatic hydrocarbons or chlorinated solvents for cleaning. These solutions will react with the plastics used in the Meter.

Clean the instrument case with a damp cloth and mild detergent.

Battery Replacement

⚠️⚠️ Warning
To avoid false readings, that could lead to possible electric shock or personal injury, replace the batteries as soon as the low battery indicator (▌) appears.

To replace the batteries, see Figure 10:
1. Turn the Meter off.
2. Use a flat head screwdriver to loosen the battery compartment door screw, and remove the door from the case bottom.
3. Remove the batteries.
4. Replace the batteries with four new AA batteries.
5. Reattach the battery compartment door to the case bottom and tighten the screw.

Figure 11. Changing the Batteries
# Specifications

## Electrical Specifications

### Current Measurement

**With Jaw**
- **Ranges**: 0-20.99 mA; 21-100 mA
- **Resolution**: 0.01 mA; 0.1 mA
- **Accuracy**: 0.2 % + 5 counts; 1 % + 5 counts

**In Circuit**
- **Range**: 0-24 mA
- **Resolution**: 0.01 mA
- **Accuracy**: 0.2 % + 2 counts

### Current Source

- **Range**: 0-24 mA
- **Resolution**: 0.01 mA
- **Accuracy**: 0.2 % + 2 counts
- **mA Drive**: 24 mA into 1000 Ω

### Current Simulate

- **Range**: 0-24 mA
- **Resolution**: 0.01 mA
- **Accuracy**: 0.2 % + 2 counts
- **Maximum Voltage**: 50 V

### DC Voltage Measurement (773)

- **Range**: 0-30 V
- **Resolution**: 0.01 V
- **Accuracy**: 0.2 % + 2 counts

### DC Voltage Source (773)

- **Range**: 0-10 V
- **Resolution**: 0.01 V
- **Accuracy**: 0.2 % + 2 counts
- **mA Drive**: 2 mA max all conditions

### mA IN/OUT (773)

- **Sourcing range**: 0-24 mA
- **Sourcing resolution**: 0.01 mA
- **Sourcing accuracy**: 0.2 % + 2 counts
- **Measurement range**: 0-24 mA
- **Measurement resolution**: 0.01 mA
- **Measurement accuracy**: 1 % FS

### Scaled mA current output to mA current input from the Jaw (773)

- **Range**: 0-24 mA
- **Resolution**: 0.01 mA
- **Accuracy**: 1 % FS
- **Response speed**: 2 times per second

### DC Loop Power

- **Voltage**: 24 V
- **Influence of Earth's Field**: <0.20 mA
- **Batteries**: 4 1.5 V, Alkaline, IEC LR6
- **Working hours**: 12 hours @ 12 mA sourced into 500 Ω

## Mechanical Specifications

- **Size (H X W X L)**: 43.7 mm x 70 mm x 246.2 mm
- **Weight**: 410 g
Environmental Specifications

Operating Temperature .............-10 ~50 °C
Storage Temperature...............-25 ~60 °C
Operating Humidity...............<90 % RH @ <30 °C; <75 % RH @ 30 ~50 °C
Operating Altitude...............0 ~ 2000 m
IP Rating...............................IP 40
Vibration Requirements ..........Random 2 g, 5 to 500 Hz
Drop Test Requirements ..........1 meter drop test (except the jaw)
EMI, RFI, EMC ......................Meets all applicable requirements in EN61326-1
Note: For current measurement w/jaw, add 1 mA to specification for EMC field strengths of 1 V/m up to 3 V/m.

Temperature Coefficients ........0.1(°C X Specified accuracy for Temperature <18 °C or > 28 °C)

Standards and Agency Approval Specifications

All products certified to the following:
EN / IEC 61010-1, EN / IEC 61010-2-032
Agency Approvals  

Miscellaneous Specifications

Power Requirements..............Four AA batteries, Alkaline , IEC LR6
Automatic Time-out (Power)......After 15 minutes ±1 minutes
Automatic Time-out (Backlight) ..After 2 minutes ±10 seconds
Automatic Time-out
(Measurement Spotlight).........After 2 minutes ±10 seconds
User Replaceable Parts

Table 2 lists all user replaceable parts.

Replacement clamp and cable assembly are available but require re-calibration. See the 772/773 Service Information Sheet for part numbers and procedures.

LIMITED WARRANTY & LIMITATION OF LIABILITY

This Fluke product will be free from defects in material and workmanship for 3 years (one year for cable and clamp) from the date of purchase. This warranty does not cover fuses, disposable batteries or damage from accident, neglect, misuse or abnormal conditions of operation or handling. Resellers are not authorized to extend any other warranty on Fluke’s behalf. To obtain service during the warranty period, send your defective product to the nearest Fluke Authorized Service Center with a description of the problem.

THIS WARRANTY IS YOUR ONLY REMEDY. NO OTHER WARRANTIES, SUCH AS FITNESS FOR A PARTICULAR PURPOSE, ARE EXPRESSED OR IMPLIED. FLUKE IS NOT LIABLE FOR ANY SPECIAL, INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES OR LOSSES, ARISING FROM ANY CAUSE OR THEORY. Since some states or countries do not allow the exclusion or limitation of an implied warranty or of incidental or consequential damages, this limitation of liability may not apply to you.
