Cautions during Use

- Follow instructions in 'Cautions during Use'. Otherwise, it may cause unexpected accidents.
- 4 - 30 VDC⎓, 24 VAC~ model power supply should be insulated and limited voltage/current or Class 2, SELV power supply device.
- Install the unit in the well ventilated place. If the area is poorly ventilated, install a cooling fan.
- Ground to the heatsink, inside the panel, or DIN rail. Failure to follow this instruction may result in electric shock.
- While supplying power to the load or right after turning off the power of the load, do not touch the body and heat sink. Failure to follow this instruction may result in burn due to high temperature of the surface.
- In order to protect the product from the short-circuit current of the load, use rapid fuse of which I^2t is under the 1/2 of SSR I^2t. When short-circuited, replace the fuse to those of same specification with the used rapid fuse.

- Install dummy resistance in parallel with the load, to keep the sum of current flowing in the load and dummy resistance being over SSR minimum load current.
- When using random turn-on model for phase control, install noise filter between the load and the power of the load.
- Do not use near the equipment which generates strong magnetic force or high frequency noise.
- This unit may be used in the following environments.
  - Indoors (in the environment condition rated in 'Specifications')
  - Altitude max. 2,000 m
  - Pollution degree 2
  - Installation category III

Cautions during Installation

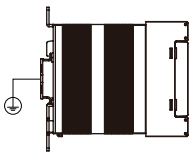

■ Spacing

- When installing multiple SSRs, be sure to keep space between SSRs for heat radiation.
- When installing SSRs horizontally (input part and output part on the same height), be sure to supply less than 50 % of the rated load current.

■ Grounding

- Ground the DIN rail.

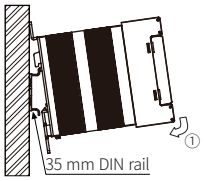

Mounting

- It can be mounted on a 35 mm DIN rail conforming to EN 60715 standards.

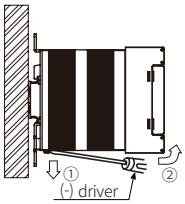

■ Mounting with DIN Rail

Put the product on DIN rail and press it to the direction ①.

■ Removing with DIN Rail

Push the latch to the direction ① with a tool and pull the bottom of the device in the direction ②, then lift the product.
