

## **B-Series Switches –** Pressure, Differential Pressure & Hydraulic

#### **FEATURES**

- Adjustable setpoints 15-100% of range
- Fixed or limited adjustable deadband
- Wide selection of switch elements
- Explosion proof enclosure provides uncompromising protection
- Special designs for NACE & fire applications
- SIL 3 Capable (B and D series only)

#### **TYPICAL USES**

- Offshore oil rigs
- Chemical and petrochemical plants
- Pulp and papermills
- Steel mills
- Power plants
- Water and sewage-treatment plants
- Other corrosive environments

#### SIL 3 CAPABLE

- Highly reliable
- Designed for use in wide range of applications
- Pressure ranges from vacuum to 7500 psi

## **SPECIFICATIONS**

Setpoint: Factory set or field adjustable

±1% of full range (Additional setpoint shift of Setpoint Repeatability: ±1% of range per 50 °F from initial setpoint

set at 70 °F typical)

**Enclosure Rating:** B4/Hydraulic: NEMA 4X, IP66

B7: NEMA 7/9, IP66

Enclosure Material: Epoxy coated aluminum (standard)

Optional: 316 stainless steel (NEMA 7/9 only)

Diaphragm Material: Buna N, Viton, Teflon, SS, Monel

1/4 NPT Female (standard) Pressure

Optional: 1/2 NPT Female, 1/4 NPT Female & Connection:

1/2 NPT Male combo

**Electrical Output:** SPDT or DPDT

Electrical 3/4 NPT Female (standard) Termination: Optional: 1/2 NPT Female Ambient -20°F to 150°F (-28°C to 65°C)

Temperature Range: All units calibrated at 70 °F

0 °F to 150 °F (Buna N or Teflon diaphragm) Process 20 °F to 300 °F (Viton diaphragm) Temperature:

0°F to 300°F (SS or Monel diaphragm)

Pressure: Vac-3000# Pressure Ranges:

Differential: 0-600#D Hydraulic: 1000-7500#

Approvals: UL E34743 (B4/D4)

E38812 (B7/D7)

CSA: 55541 ATEX: Sira 02ATEX1391X (B7/D7 with XCN)

**IECEX SIR 14.0077X** 

FM: Limit Contol and Steam Limit Control

#### NOTES:

- Switches may generally be set between 15% and 100% of nominal range on increasing pressure. Consult factory for applications where setpoints must be lower.
- All deadbands are given in English units as shown in the nominal range column. Deadbands shown are for switches with Buna N diaphragm.

Approximate deadbands for optional diaphragms:
Viton: Multiply Buna N value by 1.4
Teflon: Multiply Buna N value by 1.2
Stainless Steel: Multiply Buna N value by 1.7
Monel: Multiply Buna N value by 1.7

- 3. Deadbands given are for zero static working pressure.
- For approximate deadbands for dual switch elements, multiply the single switch element by 1.6.
- 5. Proof pressure is 4000 psi with stainless steel and monel welded diaphragms.

# B-Series Switches – Pressure, Differential Pressure & Hydraulic

Ashcroft Inc. supplies highly reliable Ashcroft® switches and controls for industrial and process applications. We begin with rock-solid designs, matching the most appropriate technology with the safety and reliability requirements of the applications. The materials of construction are specified to Ashcroft's exacting standards, and product is built to last in the toughest applications. Our modern, responsive manufacturing facility is supported by an extensive network of stocking distributors and factory sales offices located in virtually every part of the world. Special application assistance is always just a telephone call away.

The Ashcroft B-Series switch line is designed to satisfy most switch requirements. Materials of construction have been selected for long life. A wide variety of precision switch elements are available to meet every application requirement, including hermetically sealed contacts for added reliability and safety. The actuators we use have been proven in more than 20 years of service in the world's plants and mills. Special designs are available for fire safety, NACE, limit control and other more stringent requirements. Simplicity and ease of use are stressed to improve reliability of the installation.

Applications include: pumps, compressors, washers, filters, degreasers, evaporators, recovery systems, food processing, ground support equipment, reverse osmosis systems, heat exchangers, hydraulic systems, lubrication systems, marine equipment, textile machinery, heating and air conditioning equipment.

#### **Pressure & Differential Pressure Switches**

B-Series pressure, differential pressure and vacuum switches use two different actuators depending on setpoint requirements. For setpoints between 2 and 3000 psi, the simple, rugged diaphragm-sealed piston actuator is used. This design features high reliability and choice of actuator seal materials for virtually every application. An optional welded design is also available for setpoints up to 1000 psi for maximum reliability. This design is available in 316 SS or Monel. Differential pressure models use a unique, dual diaphragm-sealed piston design that features very high static operating pressures and small size.

For setpoints between 4.5 and 150 inches of H<sub>2</sub>O, a large diaphragm is used for increased sensitivity in both pressure and differential pressure designs with good choice of materials of construction.

All standard models feature  $\pm 1$  percent of range setpoint repeatability and a minimum of 400 percent of range proof pressures.

These standard designs perform well in applications where shock and vibration could be a problem and may be used in conjunction with Ashcroft diaphragm seals in extreme services such as slurries or abrasive process fluids.
