

Badger Meter® provides connections and flanges for use with Recordall® meters (Disc, Turbo, Compound, and Fire Series) and with E-Series® and E-Series G2® Ultrasonic meters.

Connections and flanges generally must be ordered in complete sets, which include rubber washers or gaskets and hardware. Additional washers, gaskets and hardware are also available as separate items.

The plastic swivel and the plastic/NL bronze swivel connections permit meter installation in misaligned pipe situations with as much as 1-1/2 inch offset. These connection sets also include O-rings for a superior seal with minimum force.

IMPORTANT

Badger Meter recommends that you replace the entire connection set at the time of meter replacement, or earlier if conditions require.

Plastic Swivel Connection Sets for E-Series Ultrasonic Meters

Complete set with rubber washers and O-rings
