

ENVIROMAG 2000 Technical Datasheet

Electromagnetic Flow Sensor

- Engineered and manufactured for the North American water and wastewater industry
- NSF Approved for potable water
- Proven and unsurpassed lifetime performance
- Long-term reliability and durability
- Available IP68 rating
- Available for direct burial installation

Solution for the water & wastewater Industry

The ENVIROMAG 2000 magmeter is the optimum solution for North American water and wastewater measurement applications. It's design and performance makes it the choice for flow measurement throughout the process.

1. Flanged design
2. PP, Polyurethane and Hard Rubber liner
3. 3/8" to 80" diameter
4. ANSI or AWWA flanges

Highlights

- Short inlet and outlet runs
- Unaffected by contamination, solids, fibers, slurries
- No maintenance
- Wet calibrated - includes calibration report
- Suitable for potable, chlorinated, fluorinated water, etc.
- Continuous self diagnostics
- NSF approved (Hard Rubber Liner)
- Available "virtual reference" eliminates grounding rings

Applications

- Wastewater processes
- Desalination processes
- Irrigation networks
- Clean water processes
- Water distribution
- Cooling stations - district heating

Notes:

¹ If flowmeter is supplied with separate grounding rings, the totals fitting length "L" is computed as follows: "L" + 2 x 3 mm (1/8") + 2 x gasket thickness

① The value may vary depending on the used cable glands.

- All data given in the following tables are based on standard versions of the sensor only.
- Especially for smaller nominal sizes of the sensor, the converter can be bigger than the sensor.
- Note that for other pressure ratings than mentioned, the dimensions may be different.
- For full information on converter dimensions see relevant documentation.
