

## Accessory Kits

*The intrinsically safe 475 Field Communicator allows you to quickly and efficiently perform device tasks in the field.*

- *Increase productivity with your 475 Field Communicator*
- *Easily update your 475 Field Communicator*

### Field Accessory Kit

The Field Accessory Kit provides you with key accessories that deliver even more productivity from your 475 Field Communicators. The following accessories are included:

- Protective Rubber Boot
- Ruggedized 250 Ohm Load Resistor
- Magnetic Hanger
- Stylus (set of 2)
- Technical Training CD

*Field Accessory Kit*

The **Protective Rubber Boot** provides extra protection for your communicator when you take it to the field, minimizing the scratches and bumps that occur with field use. The protective rubber boot also includes a stand to facilitate using your communicator on the bench.

The **Ruggedized 250 Ohm Load Resistor** allows you to introduce the necessary load resistance when connecting a 475 Field Communicator and power supply to a HART device. It conveniently plugs into the HART terminals between the communicator and the lead set.

The **Magnetic Hanger** connects to the back of the 475 Field Communicator, allowing it to be hung from metallic structures in the field, like pipes, tanks, etc., to free up your hands for other tasks.

The **Stylus Set** provides two spare styli in case your original stylus is lost or misplaced.

The **Technical Training CD** provides a self-paced, narrated technical training course on how to use the 475 Field Communicator with both HART and FOUNDATION fieldbus devices.

It is recommended that you have one Field Accessory Kit for each 475 Field Communicator in your plant.

## Shop Accessory Kit

The Shop Accessory Kit includes one complete Field Accessory Kit plus the following items:

- System Card (SD) Reader with USB Interface
- Bluetooth Adapter or IrDA to USB Adapter\*
- Resource DVD

The **System Card (SD) Reader** can be used with the Easy Upgrade Utility for major software and device driver updates. A System Card Reader delivers a much faster update solution, compared to the wireless interfaces.

The **Bluetooth Adapter** provides a convenient way to perform routine updates without removing the system card from the communicator.

The **Resource DVD** contains the Easy Upgrade Utility, User Manual, and other important 475 documentation.

*Shop Accessory Kit*

It is recommended that you have one Shop Accessory Kit for each location that will be involved in updating your 475 Field Communicators.

\*Shop Accessory Kit (00475-0019-SK01) contains the Bluetooth Adapter and is available in countries where the 475 Field Communicator has Bluetooth spectrum approval. For countries without Bluetooth approval, a separate Shop Accessory Kit (00475-0019-SK02) is available and contains the IrDA to USB Adapter instead of the Bluetooth Adapter.
