Eurotherm®

Precision at the heart of your process

Eurotherm EPC2000 programmable controller

Benefits

The EPC2000 programmable single loop temperature and process controller provides efficient and repeatable precision control in a convenient and easy to deploy DIN rail and surface mounting format.

The controller combines precise control and measurement performance with a high speed Ethernet connection incorporating an integral switch for daisy chain connection to supervisors, panels or PLCs. Cybersecurity is certified to the stringent requirements of Achilles® CRT Level 1.

- Complements your PLC and/or can be used stand-alone
- Precision analog measurement for repeatable control
- Flexible communication options
- Easy to deploy
- Dual Ethernet ports
- Can reduce total system costs

Key Features

- Precision Single Loop Control
- Setpoint Programming
- Math and Logic
- Communication Protocols
  - Modbus Master/Slave (TCP/IP)
  - EtherNet/IP Server
- Help defend OEM knowledge and IP with OEM Security
- EN ISO 13849-1 Performance Level "c"

eurotherm.com/epc2000

Life Is On | Schneider Electric

Specifications

General

|	
Controller function	Single loop DIN mount PID controller range with autotune, on/off and valve positioning (no slidewire required). Single loop setpoint programmer/profiler up to 10 profiles of 24 segments or 20 profiles of 8 segments. 24V ac/dc options.
Ethernet	100BASE-T with integral switch. Achilles® Communications Robustness Testing Level 1.
Measurement input	Single input. +/− 0.1% accuracy
PID control	Two PID sets are available as standard with separate proportional band for heat and cool. Enhanced auto-tuning control with cutback to minimize overshoot and oscillation. Fast reacting precision control to setpoint changes or after process disturbances. Enhanced valve positioning (unbounded) algorithm. Gain scheduling allows PID selection for a wide range of operating situations, including deviation from setpoint, absolute temperature, output level and others. PV and SP feed-forward functions.
Setpoint Programmer/Profiler	Maximum 20 program sequences of 8 segments. Options for 1x8, 1x24, 10x24, with textual program and segment names Holdback ("guaranteed soak"), event outputs, time to target, ramp rate, dwell, step and call segment types. Additional timer functions available.
User function block wiring	Optional function blocks including: totalizer, math, logic and multiplexing, BCD conversion, counter/timer, LIN16 and Zirconia.
Additional functions	Average, min, max. 6 configurable alarms with manual, automatic, non-latching and event types plus alarm delay function and blocking. Alarms may be inhibited in standby. 5 recipes with 40 selectable parameters switchable from digital input.
Backup and configuration tools	Eurotherm iTools software for backup and configuration. iTools also connects using Ethernet (Modbus TCP) and/or serial (Modbus RTU).

Mechanical Mounting

Mounting	Mounting is top hat EN50022 DIN rail or surface mounting through fixing screw holes provided. Vertical mounting only. No horizontal separation required between units.
IP Rating	IP20*
Weight	0.21kg (0.46lb)

* IP20 rating achieved with all connector plugs fitted

Specifications

Inputs and Outputs

Analog Inputs	1 Universal input
Form A relay output	1
Form C relay output	1
Logic IO (SSR drive)	1 (mutually exclusive with dc Output)
DC Output	1 (mutually exclusive with Logic IO)
Contact closure logic input	2

Communications

Ethernet	Dual Ethernet switch. Shielded grounded RJ45 connections supporting 10/100BASE-T auto sensing. Fixed IP address or DHCP. Modbus/TCP Slave, EtherNet/IP Server and Modbus TCP/IP Master
Serial	EIA-485 Half duplex Baud rates 9600, 19200 Modbus RTU 8 data bits, odd/even/no parity selectable

Universal process input

Input types	Thermocouples, Pt100/Pt1000 RTD, 4-20mA, 0-20mA, 10V, 2V, 0.8V, 80mV, 40mV, zirconia (oxygen probe), pyrometers. For other input types, contact your Eurotherm supplier for advice. Accuracy ±0.1% reading, when subject to the necessary field calibration.
Sample time	Sample rates are 20Hz for mV/mA, 16Hz for thermocouple and 10Hz for RTD.
Mains rejection	Series mode rejection 48-62Hz >60dB. Common mode rejection >150dB
Sensor break	AC sensor break. Break detected within 3 seconds worst case.
Input filtering	OFF to 60 seconds filter time constant.
User calibration	User 2 point input adjust (offset/gradient), transducer scaling
Thermocouple	K, J, N, R, S, B, L, T as standard, plus 2 downloadable custom curves Linearization accuracy CJ calibration accuracy: <±1.0°C at 25°C ambient CJ ambient rejection ratio: better than 40:1 from 25°C ambient CJ automatic (internal), variable (external fixed 0 - 50°C)

Input Ranges

		40mV	80mV	0.8V	2V	10V	RTD (Pt100)

Specifications

Logic IO (SSR Drive)

Output rating	ON 12V dc 44mA max. Minimum control cycle time 50ms (auto)
Output functions	Time proportioned heat, time proportioned cool. SSR drive alarm and event outputs, interlock outputs, other functions available using soft wiring.
Contact closure (input)	Contact open > 400Ω, Contact closed < 100Ω
Input functions	Auto/Manual select, Integral hold, Control inhibit, Program run functions, Recipe select, PID select, BCD bit, Autotune enable, Standby and other functions available using soft wiring.

DC Output

	Current output	Voltage output
Range	0-20mA	0-10V
Load resistance	<550Ω	>450Ω
Calibration accuracy	< ±(0.5% of reading + 100uA offset)	< ±(0.5% of reading + 50mV offset)
Resolution	13.5 bits resolution	13.5 bits resolution
Output functions	SCR/Power control drive. Proportional valve. Retransmission to chart recorder or other instrumentation. Other functions using soft wiring.	

Relays (Form A & Form C)

Types	Form A (normally open) Form C (changeover) Integrated snubbers (MOV type)
Output functions	Time proportioned heat, time proportioned cool. SSR Drive. Direct valve raise/lower. Alarm and event outputs, interlock outputs, other functions available using soft wiring.
Rating	Min 100mA @ 12V, Max 2A @ 264V ac resistive.

Contact closure logic inputs

Thresholds	Open > 400Ω, Closed < 100Ω
Input functions	Auto/Manual select, Integral hold, Control inhibit, Program run functions, Recipe select, PID select, BCD bit, Autotune enable, Standby and other functions available using soft wiring.

Specifications

Operator interface	
Type	No integrated HMI, support for external HMI via communications. Proface GP4100 recommended. Diagnostic indication via LEDs on front face.
