

Diaphragm - Type Diaphragm Seal

Type L990.10 - Standard Welded Diaphragm Seal

WIKA Datasheet L990.10

Applications

Process industry diaphragm seal to combine bourdon tube pressure gauges. Intended for corrosive, contaminated, hot or viscous pressure media.

Features

- Multi-purpose diaphragm seal
- Threaded process connection
- Diaphragm welded to upper housing

Design

The diaphragm is welded to the upper housing which allows the replacement of the lower housing without jeopardizing the integrity of the system fill fluid and installed instrument. The upper and lower housing are bolted together and sealed by use of an O-ring. Process wetted components can be manufactured with solid metallic and nonmetallic materials.
