MX Temperature Controller

The flexibility of a fully integrated temperature controller or clamp-on immersion circulator.

Features:

- ±0.07°C temperature stability
- 135°C maximum temperature
- Large, universal icon and English display
- Single-speed pressure pump
- User-adjustable high and low temperature limits and alarms
- On-screen prompts
- Single-point calibration
- Safety Class I (DIN 12876-1)

Versatile

The MX Temperature Controller is available as either a fully integrated bath model or as a clamp-on immersion circulator you can mount to your own bath or tank. In either configuration, it delivers ±0.07°C temperature stability at temperatures as high as 135°C.

Intuitive

Three control buttons and plain-text on-screen prompts make the setup and operation of the MX Temperature Controller easy and straightforward.

Safe

User-settable high-temperature safety provides over-temperature and low-liquid-level protection and integrated (patent-pending) design protects pump and heater while simplifying cleaning and maintenance.
