Digital Switchboard Meters

## Other Catalogs Available...

### Power Transducers

Yokogawa Juxta Power Transducers (models 2469, 2489) are UL recognized and enclosed in a rugged case with either 0.2% or 0.5% accuracy.

### Panel Meters

Options  
Available

Yokogawa has the broadest line of panel meters available today. In many cases, our panel meters are completely interchangeable with other manufacturer's products. UL and IP54 splash resistant models are available.

### Switchboard Instruments

Yokogawa is the world leader in Analog Switchboard Instruments. Our catalog contains the entire switchboard line including AB/DB 14, 16, 17 and 40, and type 180 edgewise. It also includes the 2180 mini-switchboard meters, potential transformers, transducers and digital switchboard meters.

# Power Series<sup>Plus</sup>

## Digital Switchboard Meters

The POWER SERIES<sup>Plus</sup> digital switchboard meter was developed by Yokogawa Corporation of America to provide our customers with a versatile AC digital power meter. The heart of our POWER SERIES<sup>Plus</sup> meter incorporates the latest DSP microprocessor technology. Careful and thoughtful design has resulted in a family of user-friendly, field-adjustable meters. The design of the POWER SERIES<sup>Plus</sup> combines a high accuracy digital switchboard meter with transducer output which can be configured in the field by an end-user, or when installed in new electrical equipment by an OEM. It eliminates requirements for a large inventory of dedicated instruments, and provides flexibility when new panel designs or system upgrades require changes in instrument transformer ratings. Our rugged metal case fits standard panel cutouts for switchboard meters and makes it a perfect replacement for less versatile instruments. The RS-485 communications option allows up to 32 meters to be networked together for remote monitoring and control. In addition, the POWER SERIES<sup>Plus</sup> can be set up and locked out for security via the remote communications option.

### *The 2493 triple display multifunction power meter...*

Ideally designed for easy retrofit into existing switchboard meter panel cutouts. The 2493 features three easy to read LED displays, minimum/maximum values at the touch of a button, scaling up to 9999. Optional 0-1mA DC and 4-20mA DC analog outputs are configurable by the user and RS485 communications option is available at no additional cost.

## Features

- Scaling of the instrument for PT (potential transformer) primary ratings up to 9999; and CT (current transformer) primary ratings up to 9999.
- Adjustable transducer output proportionate to the primary input setting.
- Electrical legends (i.e., Watts, Kilowatts, Megawatts) can be set by the user and indicated by a red LED adjacent to the selected legend.
- Display average setting: Adjustable to obtain a “rolling average” of inputs. Increasing the number of samples reduces annoying “digit bounce” by the least significant digit.
- All settings are stored in non-volatile memory. If there is a loss of power to the instrument, all settings will remain as they were prior to power loss.
- Accuracy of  $\pm 0.2\%$  of reading,  $\pm 0.1\%$  of full scale.
- True RMS current and voltage measuring capability. A most desirable feature when distorted wave forms are present on the line.
- High resolution/ high intensity LED displays that can be viewed from almost any angle.

Digital Switchboard Meters

## Set-up and Configuration (2491, 2492)

The POWER SERIES<sup>Plus</sup> can be configured for primary and secondary transformer inputs, legends, outputs and averaging function. At Yokogawa, we program each model according to the specified options required by the user. This minimizes the number of steps to set up the instrument at the job site or on the factory floor.

Each model is programmed only for the options selected, so there are no unnecessary menu items. If you select a Voltmeter without analog output, then set up will be limited to PT ratios, LED display, and average setting. All can be accomplished in less than one minute. If no transformer is required, the ratio entered for PT P and PT S is 1 (1:1).

Set up functions appear on the display as symbols. They are accessible when you press the MODE pushbutton located behind the front cover and beneath the LED display. After pressing MODE, you are in the setting mode “rSEt” and can begin setting up. Error codes during set up mean your inputs may be incorrect or outside of the range of the instrument. Refer to the instruction manual for range/span restrictions for each model selected.

The pushbutton setting switches are described below. In order for a setting to be entered into memory, you must complete all entries for that mode such as: “PT P” and “PT S” (PT primary and PT secondary). If the values do not need to be changed from a previous setting, simply push the EN switch several times to go to the next mode.

After auxiliary power connection and removal of the cover, the instruction manual will guide you through set up. Pushbutton switches are located directly below the LED display. The POWER SERIES<sup>Plus</sup> can be set up before, or after installation in a panel. Once set up is complete, replace the cover and make the appropriate input connections.

### PUSHBUTTON SETTING SWITCHES (under the cover)

#### Mode

*Mode switch transfers user back and forth between standard mode (present setting) and “rSEt” mode.*

*This switch moves from one unit setting to another, or mode to mode*

*This switch moves digits to selected values and moves decimal position.*

#### EN

*After each setting, this switch enters input data, then proceeds to next sequence.*

## Set-up and Configuration (2493)

The new triple display POWER SERIES<sup>Plus</sup> has front panel pushbuttons which can be used for setting voltage and current inputs from instrument transformers, as well as analog outputs and a rolling average. The exact functions depend on the model options selected by the customer. For example: If you selected a 3 in 1 Voltmeter with no analog output, you would only need to set the PT ratio and average. If you are tied into a network with RS485, then you would also need to identify the network address and baud rate.

All set-up functions can be performed using the four buttons on the front panel (see below). You can also use the buttons to display the minimum and maximum readings and, on some models, to change from phase to phase.

### PUSHBUTTON SETTING SWITCHES (front panel)

*This button starts all operations. When viewing or changing settings it is used to back out of a mode.*

*This button can change the phase being displayed. When viewing or changing settings, it moves between settings or between digits.*

*This button will increment the value being changed. It is also used to display Max readings.*

*This button, when viewing or changing settings, is used to select a mode, save it, and then move to the next mode in the sequence. It is also used to display Min readings.*

All button operations begin with the Mode button. To see the Min or Max, push the Mode button and then the button of the reading you want to see - Min or Max. The values will display for 10 seconds before reverting to the normal display. If you want to reset the values, push the Min or Max button again before 10 seconds have passed.

If the model that you select can change between phases, it is done by pressing the Mode button first, and then the Next button. The display will switch to the next phase in the sequence. For example: A Volt-Amp-Hertz meter with 3P4W connections would cycle A-B-C-AB-BC-CA and then back to A. To view the configuration settings, press Mode twice (Mode-Mode) and then press Set. The first setting will be displayed. For a Triple Amp meter this setting will be the Current Transformer (Ct), for all other models this will be the Potential Transformer (Pt). To see the other settings, press Next. You can scroll through all the settings by pressing Next. To go back to normal operations, press Mode. To change the setting being shown, press Set. See the above paragraphs on the specific settings for details. Once a setting is changed it will display the next setting. At any point while changing settings, pressing Mode will exit without changing anything.

- 25 240 VOLT / 5A AC
- 31 480V AC / 1 AMP
- 35 480V AC / 5 AMP

### 3. FREQUENCY

- 1 50/60 Hz

### 4. ANALOG OUTPUT

- AAA NONE
- AFA 0 to 1 mA
- AHD 4 to 20 mA

### 5. COMMUNICATION

- 1 YCA Protocol
- 2 MODBUS

### 6. AUX. POWER

- 1 120/240V AC
- 3 24V DC
- 4 48V DC
- 5 125V DC

### NOTES:

- 1) NIST CALIBRATION CERTIFICATE: SPECIFY AND ADD \$50.00 EACH NET PER UNIT.
- 2) NIST CALIBRATION CERTIFICATE WITH TEST DATA: SPECIFY AND ADD \$100.00 EACH NET PER UNIT.

## 3 in 1 AC VOLT OR AMP

MODEL FORMAT: 2493

Insert model code from the selection below:

MODEL 2493

### 1. FUNCTION

- 01 3P3W AC VOLT
- 02 3P4W AC VOLT
- 05 3 PHASE A, B, C  
AC AMP

### 2. INPUT RATING

- 01 1 AMP
- 05 5 AMP
- 10 150 VOLT
- 20 300 VOLT
- 30 600 VOLT

### 3. FREQUENCY

- 1 50/60 Hz
- 2 400 Hz

### 4. ANALOG OUTPUT

- AAA NONE
- AFA 0 to 1 mA
- AHD 4 to 20 mA

### 5. COMMUNICATION

- 1 YCA Protocol
- 2 MODBUS

### 6. AUX. POWER SUPPLY

- 1 120/240V AC
- 3 24V DC
- 4 48V DC
- 5 125V DC

Notes:

- 1) NIST CALIBRATION CERTIFICATE: SPECIFY AND ADD \$50.00 EACH NET PER UNIT.
- 2) NIST CALIBRATION CERTIFICATE WITH TEST DATA: SPECIFY AND ADD \$100.00 EACH NET PER UNIT.
- 3) CERTIFICATE OF CONFORMANCE: SPECIFY WITH ORDER, NO CHARGE.

## 3 in 1 AC VOLT / AMP / HERTZ

MODEL FORMAT: 2493

Insert model code from the selection below:

MODEL 2493

### 1. FUNCTION/ CONNECTIONS

- 07 VOLT / AMP / Hz 1P2W
- 08 VOLT / AMP / Hz 3P3W
- 09 VOLT / AMP / Hz 3P4W

### 2. INPUT RATING

- 51 150 VOLT / 1A AC
- 55 150 VOLT / 5A AC
- 61 300 VOLT / 1A AC
- 65 300 VOLT / 5A AC
- 71 600V AC / 1 AMP
- 75 600V AC / 5 AMP

### 3. FREQUENCY

- 1 50/60 Hz
- 2 400 Hz

### 4. ANALOG OUTPUT

- AAA NONE
- AFA 0 to 1 mA
- AHD 4 to 20 mA

### 5. COMMUNICATION

- 1 YCA Protocol
- 2 MODBUS

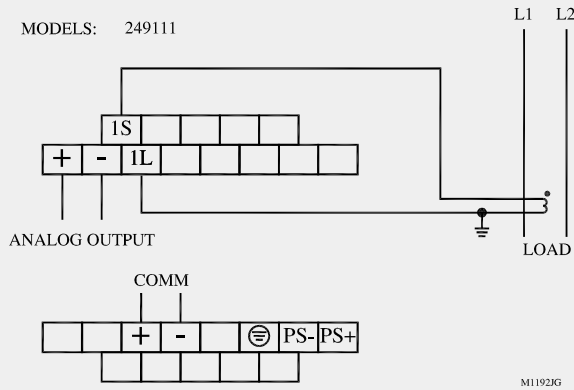

### 6. AUX. POWER

- 1 120/240V AC
- 3 24V DC
- 4 48V DC
- 5 125V DC

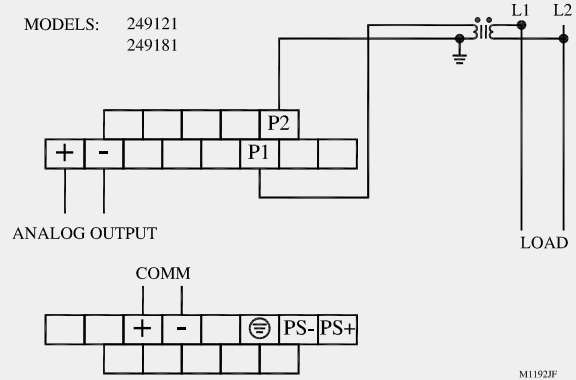

Notes:

- 1) NIST CALIBRATION CERTIFICATE: SPECIFY AND ADD \$50.00 EACH NET PER UNIT.
- 2) NIST CALIBRATION CERTIFICATE WITH TEST DATA: SPECIFY AND ADD \$100.00 EACH NET PER UNIT.
- 3) CERTIFICATE OF CONFORMANCE: SPECIFY WITH ORDER, NO CHARGE.

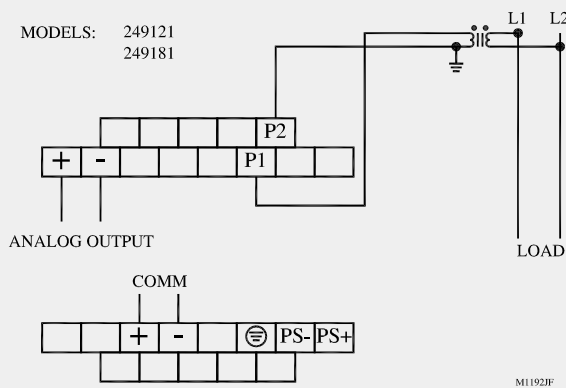

## Terminal Connections

**249111 and 249115 AC Ammeters**

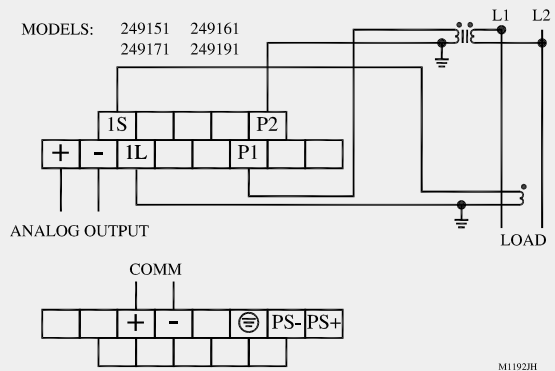

**249121 AC Voltmeters**

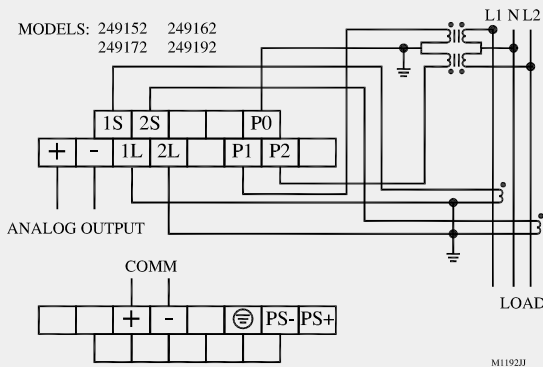

**249181 and 249183 Frequency Meters**

### 1 PHASE, 2 WIRE

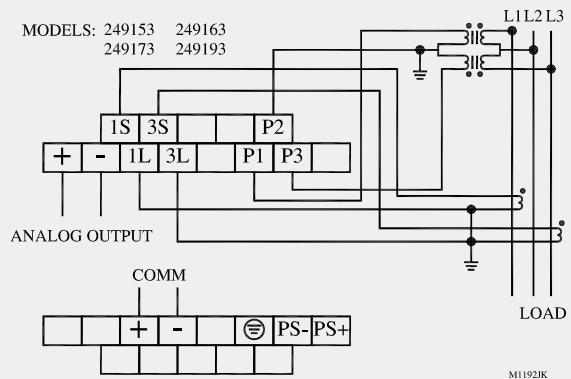

**249151 / 249161 / 249171 / 249191  
Watts / Vars / P.F. / Phase Angle**

### 1 PHASE, 3 WIRE

**249152 / 249162 / 249172 / 249192  
Watts / Vars / P.F. / Phase Angle**

### 3 PHASE, 3 WIRE

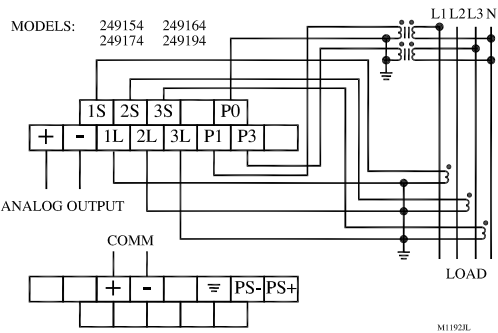

**249153 / 249163 / 249173 / 249193  
Watts / Vars / P.F. / Phase Angle**

# Power SeriesPlus

Digital Switchboard Meters

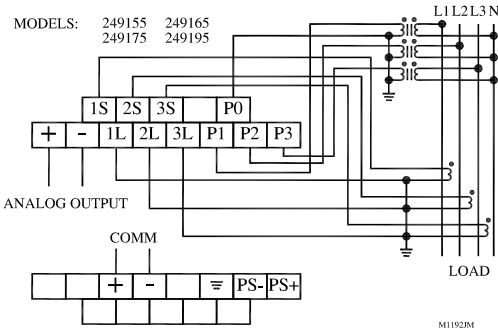

## Terminal Connections

### 3 PHASE, 4 WIRE (2 1/2 ELEMENT)

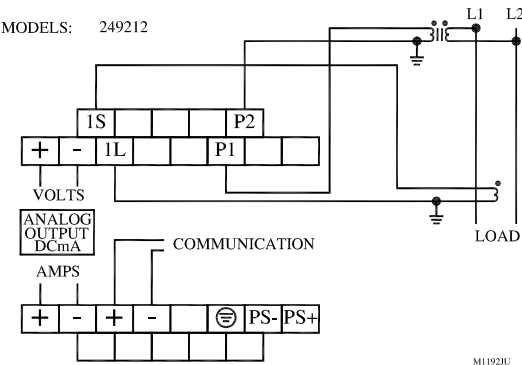

**249154 / 249164 / 249174 / 249194**  
**Watts / Vars / P.F. / Phase Angle**

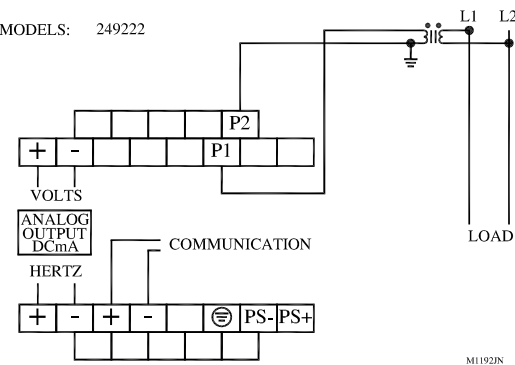

### 3 PHASE, 4 WIRE (3 ELEMENT)

**249155/249165/249175/249195**  
**Watts / Vars / P.F. / Phase Angle**

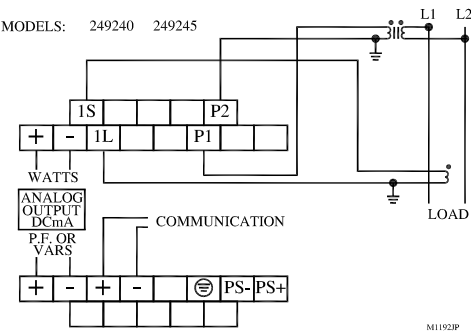

**249212 / 249213 / 249216 / 249217**  
**Dual function Volts / Amps**

**249222/249223/249226/249227**  
**Dual function Volts / Hertz**

### 1 PHASE, 2 WIRE

**249240/249245**  
**Dual function Watts / Vars, Watts / P. F.**

### 1 PHASE, 3 WIRE

**249241/249246**  
**Dual function Watts / Vars, Watts / P. F.**

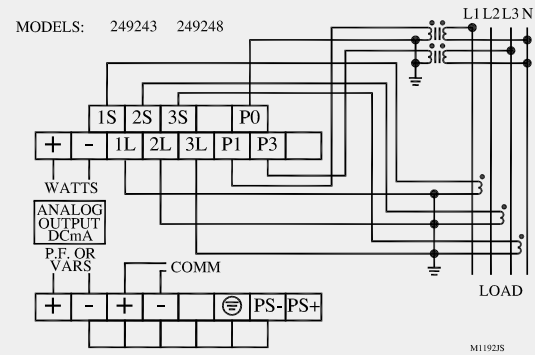

## Terminal Connections

### 3 PHASE, 3 WIRE

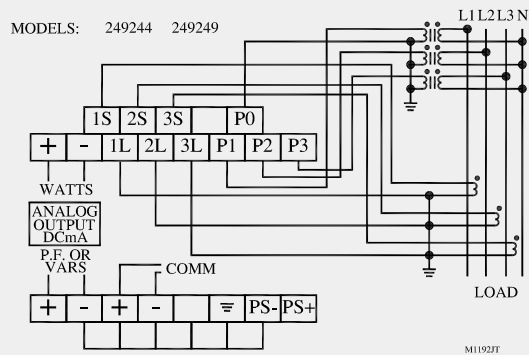

**249242 / 249247**  
Watts / Vars and Watts / Power Factor

### 3 PHASE, 4 WIRE (2 1/2 ELEMENT)

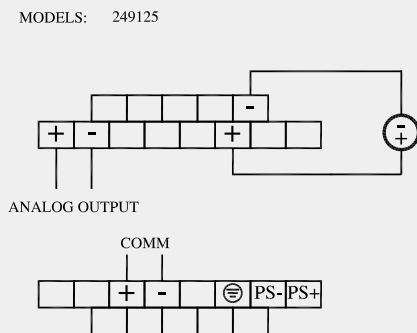

**249243 / 249248**  
Watts / Vars and Watts / Power Factor

### 3 PHASE, 4 WIRE (3 ELEMENT)

**249244 / 249249**  
Dual Function Watts / Vars & Watts / P.F.

### DC Volts

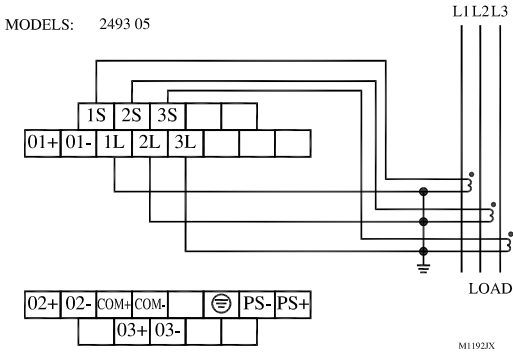

**249125**  
Volts DC

## Terminal Connections (see page 21 for notes)

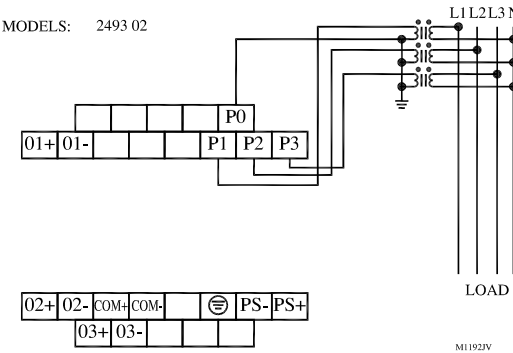

### 249305 3 in 1 Ammeter

### 249301 3 in 1 Voltmeter (3P3W)

### 249302 3 in 1 Voltmeter (3P4W)

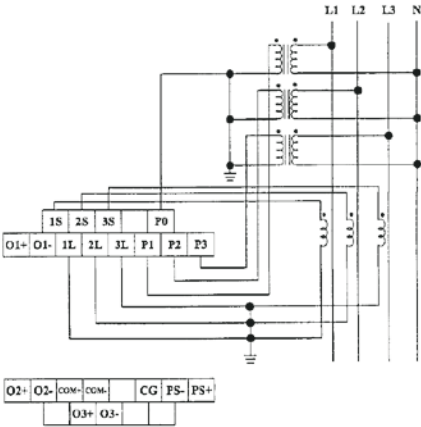

### 249307 Volt/Amp/Hz (1 PHASE)

### 249308 Volt/Amp/Hz (3 WIRE)

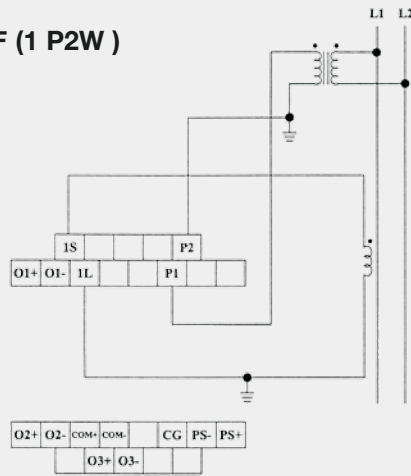

### 249309 Volt/Amp/Hz (4 WIRE)

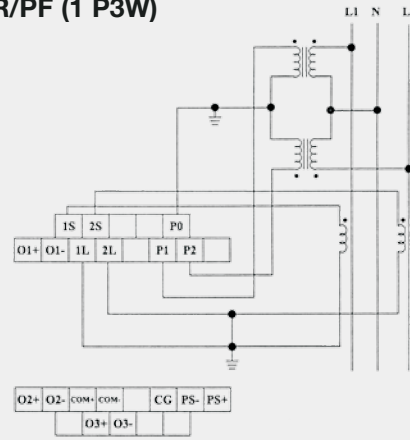

## Terminal Connections (see notes below)

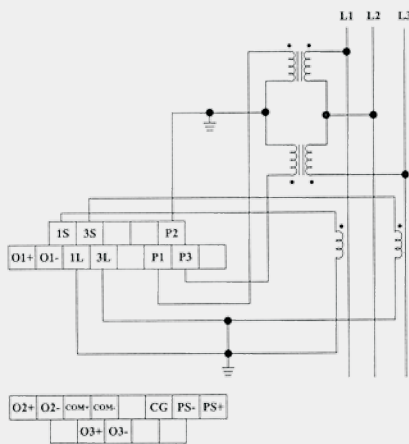

**249334**  
**W/VAR/PF (1 P2W)**

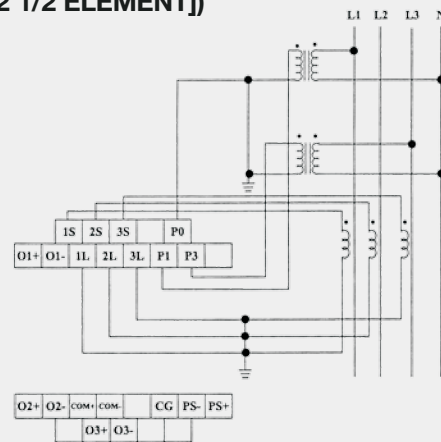

**249335**  
**W/VAR/PF (1 P3W)**

**249336**  
**WATT/VAR/PF (3P3W)**

**249337**  
**WATT/VAR/PF**  
**(3P4W [2 1/2 ELEMENT])**

**249338**  
**WATT/VAR/PF**  
**(3P4W [3 ELEMENT])**

### NOTES FOR 2493 CONNECTION DRAWINGS:

PS+ is positive Power Supply connection (line voltage for AC supplies).

PS- is negative Power Supply connection (neutral for AC supplies).

CG is chassis ground. This connection must be made for 125VDC units only.

O1, O2, O3 are analog outputs corresponding to Top Display (O1), Middle Display (O2), Bottom Display (O3).

# Power Series<sup>Plus</sup>

Digital Switchboard Meters

## OUTLINE DIMENSIONS

The POWER SERIES<sup>Plus</sup> is enclosed in a rugged steel case treated with zinc chromate to resist corrosion. The cover assembly and faceplate are constructed of high temperature polycarbonate material and have several gaskets which seal out dust and moisture from the front cover. The 26 position terminal board is a glass-filled polycarbonate material with #8 nickel-plated brass terminals inserted per the connection drawings for the model selected.

#8 TERMINAL (26 MAX)

## A Commitment to Innovation

Since our establishment in the United States in 1957, Yokogawa Corporation of America (YCA) has become a leading North American manufacturer and supplier of Test and Measurement, Field Instrumentation (Flow, Pressure and Analytical Products), Process Control Equipment, Information Products

Headquartered just south of Atlanta, Georgia, YCA has sales offices across the United States. Our commitment to our customers is our number one priority, and we back it up with a network of representatives and distributors that reflect this commitment. Our 132 manufacturing and service locations give us a presence on every major continent, which means we have the global resources to support all your application needs.

Our parent company, Yokogawa Electric Corporation, is dedicated to developing the most advanced control and instrumentation products and systems in the world. As a major global player, the company anticipates the needs of the times, continually tackling new challenges and exploring new markets in order to provide the best solutions in the world.

Yokogawa's commitment to innovation is reflected in our extraordinary investments in R&D, which ensure development of the most advanced products and services. As a result, we have secured more than 4,500 patents and registrations, representing a number of important innovations, including the world's first distributed control system and the first digital sensors for flow and pressure measurement.
