Tubular and Process Assemblies

Quick Ship

On stock chart units:

- Same day on most heaters
- 10 working days on special voltages and/or wattages
- 15 working days on special element lengths

Square Flange Immersion Heaters

Designed for use in boilers and industrial storage tanks, square flange immersion heaters offer an energy efficient solution to heating water, oils and degreasing solutions.

Consisting of WATROD or FIREBAR* elements brazed, staked, or welded to a four- or six-bolt flange, these heaters mount directly to a mating flange that is welded to a tank wall or nozzle.

Installation and maintenance is easy. Heater change-out is also simple ... unbolt the flange and replace it with another ... without extensive equipment downtime.

Performance Capabilities

- Watt densities to 100 W/in² (15.5 W/cm²)
- Wattages to 24kW
- Voltages to 480V~(ac)
- Incoloy® sheath temperatures to 1600°F (870°C)

Features and Benefits

• 2½, 3½ and 4½ inch square flanges easily adapt to application needs.

Flange materials:

Steel
304 stainless steel
Steel
Brass

- Asbestos-free gaskets come wire-tied to each flange. Spare gaskets also available.
- Epoxy or silicone resin seals, rated to 250°F (120°C) or 390°F (200°C) respectively, protect elements against moisture and other contaminants.
- WATROD hairpins are repressed (recompacted) to maintain MgO density, dielectric strength, heat transfer and life.

 UL® and CSA component recognition under file numbers E52951 and 31388 respectively. See pages 268 to 271 for details.

Applications

- Water
- Boiler equipment
- Vapor degreasers
- · Fuel oils
- Heat transfer fluids
- · Caustic solutions

Available on request:

- Sheath materials in copper, steel, 304 and 316 stainless steel and titanium
- Flange materials in titanium and 316 stainless steel
- Flange sizes to meet specific application needs
- External finishes such as passivation, belt polishing and glass beading

Other voltage and wattage ratings

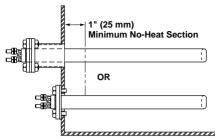

Consult your Watlow representative for details.

Tubular and Process Assemblies

Square Flange Immersion Heaters

Application Hints

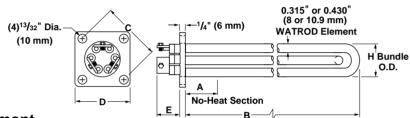

- Determine recommended sheath materials and watt densities by using the *Element and* Assembly Selection Guide on pages 262 to 263. If wattage is not known, consult your Watlow representative.
- Extend the element's no-heat section completely in the fluid at all times to prevent premature
- heater failure. See the accompanying illustration for proper placement of the no-heat section.
- Mount WATROD and FIREBAR square flange heaters horizontally and low in the tank, but above sludge level.
- Periodically remove heaters to inspect and clean the elements.

F.O.B.: Hannibal, Missouri

- Keep terminations clean, dry and tight.
- Minimize problems associated with low liquid level conditions by using a low liquid level sensor.

How to Order

To order a stock unit, please specify:

- · Watlow code number
- · Flange size and material
- Volts/watts
- Phase
- Quantity

If our stock units do not meet your application needs, Watlow can provide a made-to-order unit. For **made-to-order** units, please specify:

③ Stock or Assembly Stock units with catalog options.

- · Application
- Volts/watts
- Phase
- Flange size, dimensions and material
- · Sheath material and diameter
- Number of elements
- No-heat section below the flange
- Immersed ('B' dimension) length
- Maximum bundle diameter (H) or clearance hole size
- · Bolt pattern, if not standard
- Options
- Quantity

Availability

Stock: Same day shipment

Assembly Stock: Five to seven

working days

Modified Stock[®]: Five to seven

working days

Standard: Three weeks

Made-to-Order: Four to six weeks

Options, complexity and quantity may affect availability and lead times. Consult factory.
